Book Reviews

Analyzing Multivariate Data by J. Lattin, J. D. Carroll, and P. E. Green . . . . . .C. M. BORROR October, 426–427
A Brief Introduction to Probability and Statistics by W. Mendenhall, R. J. Beaver, and B. M. Beaver . . . . . .L. S. NELSON October, 427
Design for Six Sigma in Technology and Product Development by C. M. Creveling, J. L. Slutsky, and D. Antis, Jr. . . . . .D. HOLCOMB October, 427–428
The Desk Reference of Statistical Quality Methods by M. L. Crossley . . . . .L. S. NELSON January, 117

The Mahalanobis-Taguchi Strategy by G. Taguchi and R. Jugulum . . . . . .D. C. MONTGOMERY April, 229-230
Modern Statistics for Engineering and Quality Improvement by J. Lawson and J. Erajavec . . . . . .M. KILGO January, 118
Practical Reliability Engineering, 4th ed. by P. D. T. O'Connor . . . . . .D. R. ENO January, 118–119
Recurrent Events Analysis for Product Repairs, Disease Recurrences, and Other Applications by W. B. Nelson . . . . . .N. DOGANAKSOY April, 231–232
Response Surface Methodology: Process and Product Optimization Using Designed Experiments, 2nd ed. by R. H. Myers and D. C. Montgomery . . . . . M. A. NEMETH October, 428–429
A Second Course in Statistics: Regression Analysis, 6th ed. by W. Mendenhall and T. Sinich . . . . . .C. M. BORROR July, 332-333
Statistical Process Adjustment for Quality Control by E. del Castillo . . . . .M. JANAKIRAM July, 331–332
Statistical Process Control for Health Care by M. K. Hart and R. F. Hart . . . . . .L. S. NELSON April, 232–233
Statistical Process Control, The Deming Paradigm and Beyond, 2nd ed. by J. R. Thompson and J. Koronacki . . . . . .L. S. NELSON April, 233–234
Statistical Rules of Thumb by G. van Belle . . . . . .L. S. NELSON January, 119–120
Teaching Statistics, Resources for Undergraduate Instructors edited by T. L. Moore . . . . . .L. S. NELSON July, 332

KEY WORDS

The numbers listed by the key words are the identification numbers assigned to the articles as listed on the previous pages.

Alphabetic Optimality; 38, 39
Analysis of Variance; 4
Autocorrelation; 11, 25
Autoregressive Moving Average; 11
Average Prediction Variance; 2
Average Run Length; 12
Batch Process; 6
Blocking; 37
Calibration; 20
Categorical Variables; 3
Censored Data; 19
Centered and Scaled Intercept Model; 8
Central Composite Design; 13
Collinearity; 8
Computer Aided Design; 17
Confidence Intervals; 4
Confounding; 26
Constrained Mixture Region; 8
Contrasts; 18
Control Charts; 31, 35
Control Limits; 31
Cumulative Sum Control Charts; 16

D-optimality; 5, 17
Data Analysis; 31, 23
Data Contamination; 29
Design of Experiments; 5, 17, 28, 32, 34, 39
Design Optimality; 17
Design Optimization; 38
Dispersion; 26
Dispersion Effects; 3
Dual Response Optimization; 22
Dynamic Characteristics; 24
Engineering Process Control; 9
Environmental Monitoring; 7
Estimated Limits; 31
Expected Integrated Mean Square Error; 1
Exponentially Weighted Moving Average; 11
Exponentially Weighted Moving Average Control Chart; 16, 20
Exponential Plots; 10
Factorial Designs; 18, 37
Feedback Control; 32
Forecasting Techniques; 11, 27
Fractional Factorial Designs; 10, 26, 37
Gamma Distribution; 7
Gauge Studies; 4
Generalized Linear Model; 23, 24
Half-Normal Plots; 10
Hierarchical Models; 7
Integrated Prediction Variance; 2
Kalman Filtering; 9
Kriging Models; 1
Linear Calibration; 15
Linear Models; 39
Linear Quadratic Control; 9
Lognormal Population; 15
Mahalanobis Distance; 35
Maximum Likelihood; 12, 19
Measurement Systems Analysis; 36
Method of Moments; 12
Missing Values; 28
Mixture Experiments; 14
Mixture-Process Experiments; 14
Model Checking; 23
Modified L-Pseudocomponents; 8
Monitoring; 6
Multivariate T^2 Control Charts; 20
Multivariate Statistical Process Control; 25
Noise Variables; 3, 14
Nonlinear Calibration Models; 15
Normal Plots; 10
Normal Population; 15
Optimal Experimental Design; 1
Optimal Design; 13, 34
Orthogonal Arrays; 5
Outliers; 29, 35
Poisson Distribution; 7, 12
Prediction Bounds; 19
Prediction Variance; 38
Principal Component Analysis; 6
Process Adjustment; 30
Process Monitoring; 32
Quality Improvement; 22
Repeatability; 4
Reproducibility; 4
Residuals; 23
Response Surface Methodology; 3, 14, 22
Response Surface Methods; 1
Robust Design; 3, 23, 24
Robustness; 12
Robust Parameter Design; 14
Sampling; 7
Saturated Designs; 10
Screening; 18
Second-Order Model; 13
Sequential Designs; 37
Setup Adjustment; 9
Shewhart Control Charts; 16, 30
Signal-Response System; 24
Simulated Annealing; 34
Simultaneous Optimization; 22
Statistical Process Control; 11, 12, 20
Stochastic Adjustment; 9
Supersaturated Designs; 5
Taguchi's Robust Parameter Design; 22
Time-Series Analysis; 2
Tolerance Bounds; 15
Tolerances; 36
Trends; 25, 34
Two-Dimensional Data; 36
Variance; 26
Variance Components; 4
Variation Dispersion Graph; 38
Weibull Distribution; 19
